

ROUND BALE "TIE DOWN KIT" INSTRUCTIONS FOR BULL FLEX TARPS

THOUGH THIS OPERATION CAN BE PERFORMED ALONE, IT IS RECOMMENDED TO HAVE AT LEAST ONE ADDITIONAL PERSON FOR INSTALLATION

(KIT CONTAINS: (20) 28' ROPES, (36) 2' ROPES, AND (36) SUPER CINCHES)

- ① ATTACH SHORT (2') ROPES THROUGH THE TOP HOLE OF THE SUPER CINCH AND TIE BOTH ENDS OF THE ROPE TOGETHER.
- ② REMOVE 28' ROPES FROM BUNDLE AND LAY THEM OUT ON GROUND AS SHOWN IN DIAGRAM "B" (NUMBER OF ROPES USED WILL DEPEND ON LENGTH OF STACK)
- ③ STACK 3 BALES SIDE BY SIDE ON TOP OF THE 1ST 2 ROPES. THEN STACK 3 BALES SIDE BY SIDE ON THE NEXT ROPE.
- ④ CREATE A "3, 2, 1" PATTERN BY STACKING ON TOP OF THE BASE BALES. **(USE CAUTION AND KEEP THE PYRAMID BALANCED)**
- ⑤ LIFT THE TARP TO THE TOP OF THE STACK AND PLACE ON THE END. POSITION THE TARP SO IT WILL UNFOLD WITH THE WHITE SIDE UP.
- ⑥ UNROLL THE TARP DOWN EACH SIDE OF THE STACK.
- ⑦ FASTEN THE WEBBING STRAP FROM THE END POCKET TO THE FIRST ROPE FROM UNDER THE HAYSTACK ON EACH SIDE.
- ⑧ TAKE HOLD OF THE TRIANGLE / LOOP IN THE CENTER OF THE TARP AND WALK ON THE PEAK OF THE HAY STACK TO THE OTHER END UNTIL THE TARP IS UNFOLDED AND CENTERED ON THE STACK.
- ⑨ NOW THAT TARP IS ON STACK, TAKE THE ASSEMBLED SUPER CINCHES AND SECURE THEM TO EACH WEBBING LOOP ALONG EACH SIDE OF THE TARP.
- ⑩ PULL THE ROPE FROM UNDER THE HAY STACK AND RUN IT THROUGH THE BACK OF THE SUPER CINCH AND OUT THROUGH THE FRONT. PULL FIRMLY DOWN ON THE ROPE UNTIL ALL OF THE SLACK IS REMOVED AND SECURE THE ROPE BY PRESSING IT FIRMLY BACK INTO THE V-SHAPED CLAP OF THE SUPER CINCH WITH YOUR THUMB AND FOREFINGER.

ONCE ALL ARE SECURED, GO BACK AND TIGHTEN AGAIN, MAKING SURE THAT ALL ROPES ARE "GUITAR STRING" TIGHT.

RETIGHTEN THE ROPES EACH DAY UNTIL THE STACK FULLY SETTLES AND ROPES NO LONGER LOOSEN.

THEN CHECK WEEKLY THEREAFTER TO KEEP THE TARP FULLY STRETCHED AND TIGHT.

⚠ WARNING: IT IS DANGEROUS TO INSTALL HAY TARPS ON WINDY DAYS ⚠
